

MODULES

I.N.F. FILM

Short or long, documentary or fiction, objective, factual, shocking, fascinating, reflective and also just simply beautiful. These are the 49 nominated films that will be shown to the public at the Leokino between the 8–11th October, 2019. High in number are the countries of origin (23) as well as the topics of the films, among them overfishing, plastic waste, reforest, shepherds, submarine mission and voyages.

I.N.F. FILM is considered to be the mother of the entire festival and will take place this year for the 18th time. The internationally renowned film competition is endowed with €20,000 in five main categories, over all the “Grand Prizes of the City of Innsbruck” for the best nature and the best environmental documentary. Special prizes like the Swarovski Award for the best camera or the new Mountain Award will also be awarded.

I.N.F. MARKET

Look, smell, feel, taste. A true pleasure of the senses.

I.N.F. MARKET opens the festival on the 4th October, 2019 and transforms the Vier-Viecher-Eck (Square of the Four Animals) in Innsbruck’s old town into a marketplace. Whether fresh from the tree, the distillery or the bakery – all the products on offer come from Tyrol. High-quality food from the „Bauernkiste“ and „Bio vom Berg“ farmers reflect the diversity of Tyrol, not to mention natural cosmetics and chocolate. Purposeful seating invites you to linger and enjoy.

I.N.F. GUSTO

Whether starter or main course, dessert, organic, vegan or brazen carnal pleasure, it’s bound to be exquisite and tasty and of course, regional!

I.N.F. GUSTO integrates Innsbruck’s gastronomy and has mountain almen, country pubs and restaurants like „Die Wilderin“ create a dish from 100% regional food and put it on the menu during the festival.

I.N.F. SENSES

Join in, experience and discover.

I.N.F. SENSES sends you on urban voyages of discovery and hiking tours, enabling you to make exceptional and unusual nature encounters and take bloomy, garden strolls. The festival is enriched with an abundant, expertise-laden programme to inspire the human senses as they are wholeheartedly immersed in nature. The selected tours, speeches and lecture series are almost all free of charge.

I.N.F. SCIENCE

Glimpse, a glance: brief but illuminating, science made digestible, compact, even discussable.

I.N.F. SCIENCE, complemented by its competent festival partner, the University of Innsbruck, offers a number of scientific contributions. In the form of thematic explanations following a film or highly engaged panel discussions, experts from various disciplines provide valuable input, also for non-experts.

I.N.F. ART

To focus on protecting and respecting the nature, we are creating art. In everyday life, composed and extraordinarily.

I.N.F. ART does it with artist groups from Portugal, New York City and Berlin. Creating with kids during a Skeleton Sea “Turn Trash into Art” workshop art pieces using flotsam thrown up on the banks of the river Inn. Enchanting with “Nightingales in Berlin” in a crossover open air performance with screening, birdsongs and live music. Looking eye to eye with ants in stills and moved images.

Overview
